BRABUS Carbon rear diffuser

BRABUS Carbon rear spoiler

BRABUS Brand Package Exterior

BRABUS emblem for front grille

BRABUS Carbon Masterpiece badging front & rear

BRABUS emblem for fender

In the front, The BRABUS apron completely replaces the standard bumper and infuses the iconic face of the Range Rover platform with an even more striking appearance, underscored by a reimagined air-flow configuration. For an added

Second-Wow effect, both the central and side intakes are framed with high-grade carbon fiber elements. The specially developed BRABUS front spoiler in particular represents the impeccable fusion of form and function that BRABUS customers have come to expect, designed to both set a further unmistakable accent and reduce lift on the front axle at high speeds.

RDK sensores, valve caps

The BRABUS 600's exceptional exterior design is rounded off by 24-inch BRABUS Monoblock ZV forged wheels. Created through the use of state-of-the-art forging and CNC machining technology, their 20-spoke center-lock design radiates elegance, underscored by an unmistakable BRABUS finish as well as a robust light-weight structure engineered to improve handling. An effect, that is further enhanced by the BRABUS SportXtra control module for the air suspension, which lowers the supercar by up to 20 millimeters without compromising any of its outstanding ride comfort. The luxury SUV can be fully individualized upon request with a selection of additional wheel designs and sizes.
